

My Getting Started checklist for Lumion Pro

The right hardware?

[What kind of computer does Lumion 2024 and newer need?](#)

If the PC meets or exceeds hardware requirements then here are some easy, quick steps I can check so that I am ready to use Lumion:

My Getting Started Tasks	<input checked="" type="checkbox"/>	Notes
1. Screen Resolution:	<input type="checkbox"/>	Make sure the PC has a screen resolution of at least 1920 x1080 .
2. Most recent Graphics card drivers:	<input type="checkbox"/>	The PC and Lumion work best if the drivers are up to date. This is very important for Lumion Pro.
3. File and Folder Permissions:	<input type="checkbox"/>	It's worth checking to make sure it's plain sailing to save work.

My Getting Started Tasks		Notes
	<input checked="" type="checkbox"/>	Enough free file space is also very important :
4. Keyboard Shortcuts:	<input type="checkbox"/>	Knowing some of the shortcuts will help to improve my efficient use of Lumion.
5. Let's get going - use your CAD model in Lumion:	<input type="checkbox"/>	I have checked the Export/Import articles for information on the CAD software.
6. These learning guides will help you to get up to speed quickly with Lumion.	<input type="checkbox"/>	I have viewed the Learning Guide article and will follow the suggestions to learn more about Lumion.
7. Using a Lumion Trial?		I have already learned a lot about Lumion.
8. Get Help at any time:		Knowledge Base: Contact Lumion Technical and Customer Experience Support

Enjoy using Lumion and making great visualizations
